MINI Bag Filter Housings for Food & Beverage

- Beer
- Honey
- Water for food contact
- Food flavours
- Kombucha
- Food ingredients

Sanitary Bag Filter Housing for Size 3 & 4 filter bags (4" diameter). Suitable for food & Beverage applications

STERALine FBH MINI bag filter housings are compact units for low flow rate or batch applications. These housings have been designed for use in the food & beverage industry for the filtration of Beer, Whisky, Vodka, Infused Gin, Honey, Kombucha, water for food contact and many other food products. FBH MINI bag housings feature an easy to clean design, 316L Stainless Steel construction, 0.8Ra internal finish and come as standard with hygienic connections (triclamp, RJT, DIN11851). Optional mesh lined baskets provide an alternative to filter bags for coarse filtration of particles.

Material	Temperature	Compliance	Pressure	Flow rate
316L (1.4404)	+150°C	FDA/PED	7.5 Bar	Up to 6 m3/hr*

- Application dependent
